

DEEROSION

Design R&D De Castelli

Le collezioni DeErosion sono il risultato di un lungo lavoro di sperimentazione ottenuto integrando soluzioni tecnologiche con tecniche completamente manuali tipiche dell'alto artigianato. La particolare finitura prevede l'erosione controllata del metallo, frutto della continua ricerca sui materiali alla quale De Castelli si dedica da sempre. L'estrema versatilità della lavorazione amplifica le vibrazioni della materia esaltandone la profondità.

The DeErosion collection is the culmination of a long-standing experimentation, and is obtained by integrating technological solutions with completely manual techniques employing craftsmanship of the highest order. The distinctive finishing is created using controlled erosion of the metal, the result of ongoing research into materials which has always been a hallmark of De Castelli. The extremely versatile working process amplifies the vibrant appearance of the material, creating a great sense of depth.

DEEROSION

DeErosion è disponibile in 4 varianti con motivi ispirati a forme grafiche e geometriche (H4, H6, H7) o a forme organiche e naturali (H8). È possibile combinare modelli e finiture per una massima libertà di composizione.

DeErosion is available in 4 variations with patterns inspired by graphic and geometric shapes (H4, H6, H7) or organic and natural shapes (H8). Models and finishes can be combined enabling maximum freedom of composition.
